## Introduction

---

The roadmap presented here is based on the recommendations developed by the Baltic Loop project partners for better future cooperation of stakeholders in the transport sector, contained in **Deliverable: 5.8.1. Practical solutions – Tools for better delivery and passenger transport.**

Recommendation	Time horizon		
	Short term (less than 4 years)	Middle term (4-7 years)	Long term (over 7 years)
<b>Transport planning</b>			
Implementation of long- term thinking in transport and mobility planning	Preparation and learning participation	Pilot projects, concept development	Implementation and adjustment
Implementation of integrated transport planning approach	Pilot projects, Sustainable Urban Mobility Plan elaboration	Implementation of Sustainable Urban Mobility Plans (approach)	Integrative approach for long term transport planning documents
Improving the balance of investments and attention for cargo and passenger transport	Understanding of the needs in passenger and cargo transport sector and finding right actions for best results	Result integration into transport and mobility planning	Result integration into transport and mobility planning
<b>Explore and use Baltic Sea Region opportunities</b>			
Look for options and enhance cooperation in the region in form of similar projects	Stakeholder dialogue events and cooperation arrangements (joint programs and projects)	Implementation of joint programs and projects and generate next cooperation opportunities	Implementation of joint programs and projects and generate next cooperation opportunities
Specialization and value creation of ports	Create investigations and elaborate strategies	Implement strategy and form projects	Implementation and adjustment of the strategies
Implementation and use of Intelligent connected transport systems for ports	Development and implementation	Implementation and maintenance	
Approaching a common picture and policy on what infrastructure investments need to be made in the Baltic Sea. Involvement of businesses and governments in these negotiations and talks.	Development of ideas and initiatives. Bringing together stakeholders	Agreements on common goals, responsibilities and	Project design and implementation)

Recommendation	Time horizon		
	Short term (less than 4 years)	Middle term (4-7 years)	Long term (over 7 years)
	and running stakeholder dialogue events. Development of common projects and goals.	financing of agreed projects	
For cross-border projects, coordination between countries needs to be improved in many ways. Joint planning, common goals, common processes and the view of financing are some examples where the cooperation shall take place.	Stakeholder dialogue events	Agreements on common goals, responsibilities, financing and process management for agreed cross-border projects	
<b>Sustainability issues in the transport</b>			
Increasing the (total) share of waterborne transportation	Investigations, review and development of economic instruments and implementation of pilot projects and initiatives	Implementation of appropriate economic and other instruments	Implementation of appropriate economic and other instruments
Planning infrastructure electrification investments inclusive for commercial vehicles	Understanding of gaps for commercial vehicles	Projects and initiatives for commercial transport	
<b>Work with national governments</b>			
Counter political instability in transport planning decision making at home	Stakeholder dialogue events to address the issue. During the dialogue, maintain the recommendation for the need of long-term planning which shall be superior to the changing political priorities.		Long term strategies and concepts shall be designed in a way that the political instability is not influencing the long term, economic and sustainability planning of

Recommendation	Time horizon		
	Short term (less than 4 years)	Middle term (4-7 years)	Long term (over 7 years)
			transport systems and elements
Improve transport sector economy by forming strategic partnerships	Stakeholder dialogue events	Transnational strategic partnership agreements	Transnational strategic partnership agreements
Counter political instability linked to events abroad	Form cooperation platforms for instant communication with responsible ministries and organizations	Maintain cooperation platforms for instant communication with responsible ministries and organizations	
Learning from others for building strong networks	Use the opportunities of this project to learn more	Develop new projects and build networks	
Improve communication	Define communication goals and use efficient tools	Define communication goals and use efficient tools	
<b>Financing of transport infrastructure investments</b>			
Collaborative platforms for developing more efficient and faster financing, especially for projects which are left out of the public financing funding	Stakeholder dialogue events for exchange of ideas of rapid and independent financing	Development of cooperation platforms and tools for securing rapid and independent financing	Implementation and adjustment of cooperation platforms

Recommendation	Time horizon		
	Short term (less than 4 years)	Middle term (4-7 years)	Long term (over 7 years)
<b>Increasing competitiveness of the Baltic Sea Region by increased R&amp;D and digital services, intelligent connected transport systems</b>	Stakeholder dialogue events for exchange of ideas and joint development. Design and implementation of projects.	R&D and digital and intelligent systems are integrated into the development planning (strategies and other development planning initiatives)	Integration and prioritization into long term strategies
